Do you require a handheld remote that's not just small in size but big on functionality? The Pocket transmitter from Scanreco rises to this challenge, delivering 2-way communication with LED indicators, IP67-rated protection, simple battery swaps, and a sleek, customizable design with up to 8 buttons. Whether you need brand-specific labeling or advanced logic features, the Pocket transmitter offers flexibility without bulk – making it an excellent choice for frequent on-the-go tasks.

Why choose Pocket?

Size matters

Its compact design conserves space while providing the essential controls you need, perfect for applications requiring a handheld solution that won't slow operators down.

Configurable features

Take advantage of four different button layouts and programmable logic to create a remote tailored to your machinery and workflow demands.

Premium quality

A refined look, IP67 durability, and ergonomic construction demonstrate that this device is designed to withstand industrial environments without compromising on style or comfort.

Long battery life

The Pocket transmitter only transmits when a button is pressed, extending battery life significantly. Under normal usage, batteries may only need replacing two to four times per year.
